INDUSTRY

“

The Sabca Group wants to play a key role at the forefront of the aerospace industry. We push the industry forward by challenging boundaries with technological innovations & state-of-the-art solutions. As a designer and integrator with a high degree of added value we want to continue supporting all major flying systems around the globe and beyond.

# About Sabca

Sabca Group has operations in the three Belgian regions (Brussels, Wallonia and Flanders) and in Casablanca, Morocco.

- A **Designer & Integrator** of high added value solutions with strong technological & innovative content
- A **Resilient business model** through Coherent Diversification, Synergies and Financial Strength
- A **Key Player** in Aerospace

## STRUCTURES & EQUIPMENT

 <b>INTEGRATED ASSEMBLIES</b>	 <b>ACTUATION SYSTEMS</b>
	
	

## SOLUTIONS

 <b>UNMANNED AERIAL SYSTEMS</b>
--

Sabca offers a full range of services to space, civil and military aviation markets. Portfolio has recently expanded into the commercial autonomous unmanned systems market as an aerospace solutions integrator for the industry.

## INTEGRATED ASSEMBLIES

### PRODUCTS

- Fuselage
- Empennage
- Wing & High Lift
- Interstage

### PLATFORMS

- Commercial Aircraft
- Fast jets
- Business Jet
- Space launcher

SABCA is one of the main aerospace companies in Belgium serving aviation, space, defence, and industry markets, being a Tier-1 supplier to major OEM's.

SABCA activities are composed of **three complementary business lines**:

- Design and assembly of integrated aerostructures;
- Development and support of actuators for flight control systems;
- Development and operations of Unmanned Air Systems.

The Aerostructure business line has a wide range of competencies in design, engineering, and manufacturing of composite and metallic assemblies, offering end-to-end solutions for both bare and fully equipped structures.

## ACTUATION SYSTEMS

### PRODUCTS

- Hydraulic Actuator
- Electro-hydraulic Actuator
- Electro-mechanical Actuator
- Direct Drive Valve

### PLATFORMS

- Commercial Aircraft
- Fast jets
- Business Jet
- Space launcher

In Actuation, SABCA is the European Leader, and sole source, for design and manufacturing of all Ariane 5 rocket engine Actuators, as well as Ariane 6 and Vega launchers complete Trust Vector Control (TVC) system. Leveraging on its space Electro-Mechanical Actuator (EMA) technologies, SABCA is offering innovative EMA solutions to the larger aerospace market.

The Unmanned Aerial Systems Business is offering a wide range of services, as an integrator of aerospace grade solutions, taking benefits from the expertise accumulated in the other business lines.
